

Enlit 2022: OMS Brunch at Fully Booked OMS Product Wall

Cologne, 22.12.2022 – The OMS-Group booth with the first OMS Brunch at Enlit Europe in Frankfurt from November 29th to December 1st in the new, darker shade design was a great success. For the first time, the "OMS Product Wall" was overbooked with 32 interoperable OMS products from 25 members of the OMS-Group. Charles van Dyck from the OMS Marketing AG reported on the latest developments on the Open Metering System (OMS) during a presentation.

The "OMS Product Wall" presented the latest product developments of 25 OMS members at the OMS-Group booth. This year, Apator, Axioma Metering, B Meters, Diehl Metering, EAD/ARASYS, Ei Electronics, Elvaco, Engelmann Sensor, E. Wehrle, Pietro Fiorentini, Flonidan, G2 misuratori, Ing. Büro Lertes, Integra Metering, Kamstrup, Landis + Gyr, Lansen, Maddalena, PiiGAB, Qundis, Relay, Sensus, Sinapsi, Solvimus and Weptech were represented with their products. Visitors took the opportunity to talk to the metering experts at the booth about the OMS products exhibited and the new developments in the Open Metering System.

“The spirit of our association could be experienced at the OMS-Group booth. Members and users, as well as members of the public engaged in constructive exchanges, especially during the OMS brunch, which we hosted for the first time,” stated Jörg Fischer, Head of OMS Working Group Marketing, that organised the booth. The OMS-Group will again be present with a booth at Enlit Europe 2023, then in Paris, and will once again make the successful OMS Product Wall available to its members.

Founding Associations

Charles van Dyck from the OMS Marketing AG was involved in the Hub Session "Latest Developments in Technical Solutions by Associations" in the "Digitalisation Hub 5". The presentation entitled "OMS-Group: Defining Interoperability" gave an overview from the foundation of the OMS-Group in 2007 to the latest developments and future plans of the non-profit association. The Open Metering System (OMS) – supporting uni- and bi-directional communication for metering devices – defines interoperable data security mechanisms and will focus on future interoperable security modes/models that meet cyber security requirements. Van Dyck's speech was followed with interest by a large audience. Afterwards, he was involved in a Panel Discussions with all participants of the Hub Session, where trade fair visitors were able to ask questions about the presentations. More information about the OMS-Group at www.oms-group.org.

About OMS-Group

The OMS-Group is a 73-member strong interest group of companies from twenty countries worldwide. The founding organizations are figawa and KNX Association. With the Open Metering System (OMS) specification, the industry group has developed an open, multi-vendor, interoperable communication standard for electricity, gas, thermal energy, and water meters, as well as submetering. OMS is based on the EN 13757-x standard, has been included into the EU mandate M/441 for the standardization of smart metering systems, and is compatible with the widely-used KNX standard (ISO / IEC 14543-3 = EN 50090). Thus, building automation systems can be directly connected, e.g. for energy management. Future services such as tariff and load management can easily be realized with OMS. Smart OMS meters help save energy and support the optimal integration of fluctuating renewable energies, such as wind power or solar energy. For more information on the OMS standard and the OMS-Group, refer to www.oms-group.org.
